CONSENT TO CHIROPRACTIC CARE

Chiropractic care is recognized as being an effective and safe method of care for many conditions. You must recognize, however, that there are risks associated with all health care procedures. Please read carefully the following risks that you should be informed about.

I acknowledge that I have had the opportunity to discuss my proposed chiropractic care, including the opportunity to ask questions about the nature, extent and purpose of the proposed treatment. I have been given sufficient time to make the decision of giving consent for the care to proceed. I appreciate that results are not guaranteed, and I acknowledge that I am aware of the rare risks associated with my care, including but not limited to:

- * Muscle and joint soreness or strains
- * Fractures or Disc injuries

Print Name

- * Strokes, or stroke-like episodes (risk: 1: 1,000,000 to 1: 10,000,000)
- * Exacerbation and/or aggravation of my underlying condition

I DO NOT consent to the use of dry needling therapy.

* Nausea and dizziness

* Vascular injuries

Date

I do not expect the practitioner to be able to anticipate all potential risks and complications associated with the proposed care, but I wish to rely on the doctor to exercise judgment during the course of my treatment and to act in my best interests at all times.

Should I for any reason require emergency medical attention (i.e. CPR or Ambulance attendance) I authorise the clinic to act on my behalf.

I hereby acknowledge my consent to the performance of the proposed chiropractic care*. I understand that I can withdraw my consent at any time.

* Chlropractic care may involve the use of dry needling therapy. Dry Needling is a valuable treatment for acute and chronic pain. Like any medical procedure, there are possible complications including but not limited to; infection, hematoma (bruising) and paraesthesia (tingling sensation). In the case of needling the chest wall region, there is a rare possibility of pneumothorax (air in the chest cavity). Whilst complications are extremely rare, they must be considered prior to treatment. Patients must inform practitioners about medical conditions such as pregnancy, pacemakers, joint replacements, blood borne infectious diseases, breast implants or the use of blood thinners **prior to treatment**. Please tick the following box if you **DO NOT** consent to dry needling therapy. You can alter this consent at any time.
